

ARC-1043 6-Way Speaker Selector with Circuit Protection

Distribute your music to every room in your home with this 6-Way Speaker Selector from Digital World.

This 6-channel speaker selector allows you to distribute your audio signals to up to six different speaker "zones". An optional impedance protection circuit ensures that impedance seen by your amplifier remains constant, no matter how many speakers are in use. This switch can support up to 100 watts per channel with the protection circuit enabled or up to 140 watts per channel without the protection circuit in place.
