

Double Head IR Emitter

FEATURES

- Double head blaster-type IR emitter that repeats IR remote control signals received at an IR target and sent back through the cable to the AV equipment
- Compatible with RF IR pass back systems (5V) and hard-wired IR systems (12V)
- For connection to resi-linx® modulators connected to a video hub, or to resi-linx® IR range
- Incorporates adhesive backing to facilitate placement in front of the IR sensor of the AV equipment
- For superior performance in discrete IR installations, use RL-ACC160 IR Emitter Shield

SPECIFICATIONS

Connectors	3.5mm mini mono jack
Cord length	1.75m
Emitter type	Blaster
Emitter strength	Up to 200mm away from IR receiver
Head size (mm)	8 (w) x 15 (l) x 5 (d)
