HOME DIGITAL MODULATOR

1 GENERAL

1.1 Description

The module able to generate a signal in **DVB-T** format (Digital Terrestrial Television) from HDMI input.

It is H264 encoding, DVB-T modulation integrated device to convert HDMI signal to DVB-T RF out. It has equipped with one channel HDMI input, one HDMI out(HDMI pass-though) and one DVB-T RF out.

The module adjusts the compression rate to the available bandwidth, using the modulation **DVB-T** parameters.

It converts HDMI signal to DVB-T RF out with IR return path to allow channel changing from other rooms. Able to control remote control signals easily from coaxial cable. Long transmission distance and Simple Plug-and-Play installation

ATTENTION!

FOR THIS CONFIGURATION YOU SHOULD USE OUTPUT FREQUENCIES DIFFERENT FROM THE ONES THAT YOUR TV IS CURRENTLY USING.

2.3 Navigation and edition of values.

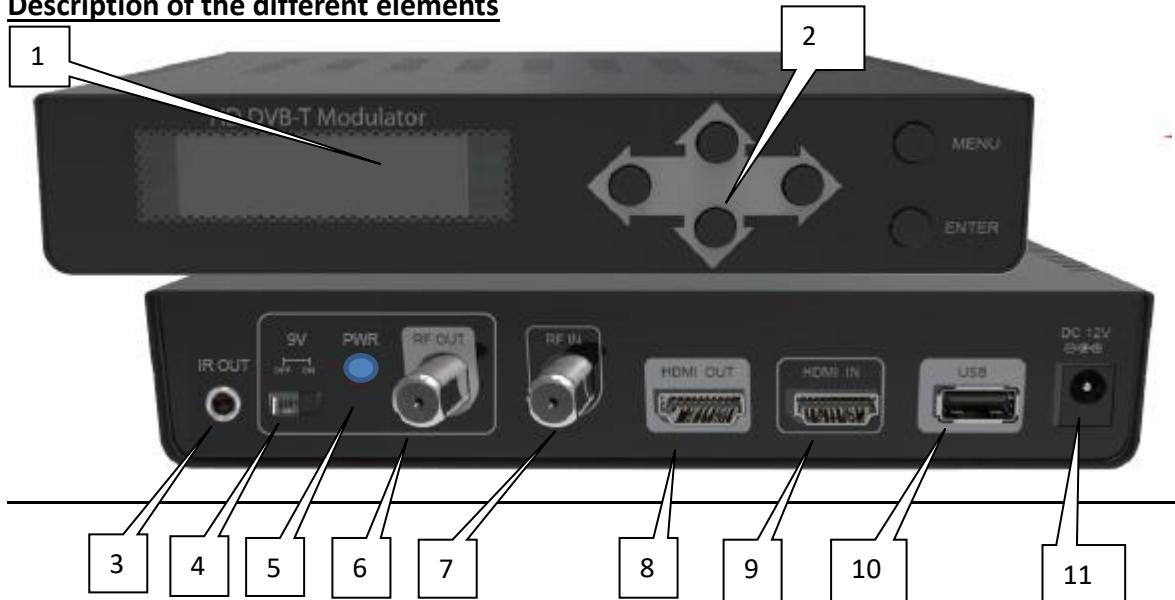

The instrument is configured through its 6 keys and front panel display. In general, it is not necessary to configure the instrument to generate a **DVB-T** signal compatible with any digital terrestrial television receiver.

-  Select parameter / menu.
-  Move Right / Left between menu / characters.
-  Increase / Decrease value of the figure / field.
-  Return to start menu
