

AKUSTILE-01

The AKUSTILE-01 is a speaker made for standard 600 mm x 600 mm ceiling tiles. No more measuring and cutting. Simply remove the tile where you want the speaker, connect the cable, and put the AKUSTILE-01 in the ceiling. Done!

It makes the AKUSTILE-01 the ideal speaker for background music and speech in meeting rooms, office buildings, schools, restaurants, hospitals and hotels. The speaker is remarkably subtle: it comes in matt black and white, allowing it to blend into any ceiling, and you can integrate it into any 70-volt, 100-volt or even standard 8-ohm system.
